	MOVEMENTS OF RUSSIANT TROOPS TOWARD POLAND	25 <b>X</b> 1
	Generalities	
	Following the well known political events in Poland in October	
	1956, heavy:movements of armored and motorized Russian columns	
	bounde for POLAND were observed in the LEOPOLI Region in October 1956.	
	During the same period, the southern disposition of the	
	Russian BALTIC First has been shifted to northeastern POLAND.

The area is a square and the perimiter measures about 10	25X1
kilometers.	
Location	
In BOGOROTSKI RAION with main entrance on BAGATERSKA Ulica.	
Director-General	
KAFTA NOV	25 <b>X</b> 1
Technical Director	
engineer MOLCANOV IZAJD,	
Workers	
about 10,000 in three shifts	25 <b>X</b> 1
Products	
synthetic rubber. It is also believed that it produces tires of various types and dimensions.  The synthetic rubber is produced from substances extracted from potatoes and from corn.	25X1
Because the plant is a large COMBINE	
there are sections prepared to produce undetermined military	
goods. The factory is not a military plant becase the military	
"Zavod" are numbered.	
Internal surveillance	
Special guards; special "pass" need to gain entrance into	
the plant. The hiring of workers is based on a political check	
by the Police.

A Soviet Economic Information	
	25X1
A Automotive Industry	
March 1957 "Lvov." Bus Plant in Lvov	•
General remarks	
In 1955 a new machine plant for the manufacture	of buses of various types
was completed and put into operation. It is located	in the southeastern out-
skirts of Lvov, in the Peresinkowa district.	
Workers	
About 1,000, in three shifts	
Products	
Various types of buses of "Lvov" make.	
B Petroleum Industry	
January 1957 Petroleum Basin at Oktiabrec (located in	n the Samara area)
	25X1
General remarks	
In 1948-1949, rich petroleum deposits were disc	overed and exploitation
was begun in the Samara region. In 1950-51, the con	struction of an oil city

named "Oktaibrec" with dwellings, installations, and refineries was begun.

••••••	(2534)	· 		
				05)//
The city is still u	nder construction and	developmen	t. It is rumored that it	25 <b>X</b> 1
will be a second Ba	ku.	•		
C Motive Power				
March 1957 Dobrotate	<u>rski H.E.S Hydroel</u>	ectric powe	r station	
				25X1
General remarks			•	
It is a new po	wer station undergoin	ng completion	on. It was built about 14	
kilometers from Lvc	v, which is on the Bu	g River. I	the power station exploits	
the water of this r	iver by means of a hi	gh-pressure	e canal. The work was beg	un
in 1956; the project	t is a grandoise one	and there w	were many victims among th	e
workers. Several e	ngineers were impriso	ned in Sibe	eria, having been accused	
of fraudulent negli	gence or sabotage.			
Capacity				
There is no in	formation concerning	the energy	which this power station	
will produce. As o	f March 1957, eight g	generators,	five of which are already	
in operation, were	installed. It is not	known what	the total number of gene	ra-
tors will be when w	ork is completed. The	ne power sta	ation will furnish energy	
to the Carpathoruss	ian area, the Ukraine	e, and Polar	nd.

"parabolic antennae or mirrors" which sight aircraft at a distance of 50	25X1 25X1
kilometers. An important one of these centers is installed in the area of	
the headquarters of the military district of Lvov and is called "Lokazionaja	
Stancija," or Locating Station - Lvov Batja-tycze.	
A sizeable agglomeration of buildings and sheds is visible in the distance	•
Rising over everything is a large conical-shaped circular antenna	25X1
and other, ordinary radio antennae on wires	05)/4
stretched between trellis towers. Civilian engineers work in this power sta-	25 <b>X</b> 1
tion. They are forced to remain constantly indoors with their families and	
are very rarely permitted to go out, and then only for urgent and justified	
reasons. Workers who have worked or are working here in its construction,	
installation, etc., are kept here for a brief period and then split up to	
work in Siberia or Central Asia.	
Also attached to the power station is an antiaircraft artillery unit	

Also attached to the power station is an antiaircraft artillery unit called "Abszlaziski Aparat" (services unit) [sic], concerning which no information is available.

## Subordination

The power station is under the jurisdiction of the military command of the Carpathian district, the headquarters of which is in Lvov. A radar antenna under the control of the above-named command will be installed on a building next to the Lvov cathedral.
